Latest prices for solar heterojunction modules

Overview

Heterojunction (HJT) module prices in the US decreased by 2.9% between November 2024 and February 2025, according to a report from solar and storage software company Anza.

Heterojunction (HJT) module prices in the US decreased by 2.9% between November 2024 and February 2025, according to a report from solar and storage software company Anza.

The module price for TOPCon technology has remained steady at US\$0.26/W in the US, according to Anza. Image: Raphael Cruz via Unsplash.

Price Stabilization After Volatility: Solar module prices have stabilized in 2025 with global wholesale prices ranging from \$0.08-\$0.28/W, ending years of dramatic fluctuations as supply-demand dynamics rebalance and weak suppliers exit the market. TOPCon Technology Dominance: TOPCon modules have.

Heterojunction Modules represent an advanced solar technology combining crystalline silicon with amorphous silicon thin-film layers. These modules deliver superior energy conversion efficiency (typically 22-25%) compared to conventional photovoltaic technologies, along with enhanced temperature.

According to our latest research, the global heterojunction solar module market size reached USD 4.2 billion in 2024, driven by increasing demand for high-efficiency photovoltaic solutions. The market is expected to register a robust CAGR of 21.3% from 2025 to 2033, propelling the market to a.
