

Kongres Container

Liquid-cooled energy storage system container

Overview

The Energy Storage System Container integrates advanced liquid cooling, high-capacity battery packs, and intelligent management systems to deliver reliable, efficient, and safe energy storage for utility-scale applications.

The Energy Storage System Container integrates advanced liquid cooling, high-capacity battery packs, and intelligent management systems to deliver reliable, efficient, and safe energy storage for utility-scale applications.

GSL Energy is a leading provider of green energy solutions, specializing in high-performance battery storage systems. Our liquid cooling storage solutions, including GSL-BESS80K261kWh, GSL-BESS418kWh, and 372kWh systems, can expand up to 5MWh, catering to microgrids, power plants, industrial parks.

The CBESS is a lithium iron phosphate (LiFePO₄) chemistry-based battery enclosure with 5MWh of usable energy capacity, specifically engineered for safety and reliability for utility-scale applications. The CBESS is designed with liquid cooling and humidity control, active balancing battery.

Delivering high energy density, exceptional safety, and flexible deployment, this utility-scale solution integrates liquid cooling for optimal performance across large-scale storage applications. The Energy Storage System Container integrates advanced liquid cooling, high-capacity battery packs.

HighJoule's 5MWh liquid-cooled energy storage system offers a reliable, efficient, and scalable solution for commercial, industrial, and renewable energy sectors. The HJ-G0-5000L/HJB-G0-5000L series ensures continuous power, reduces energy costs, and supports sustainability, with advanced liquid.

The project features a 2.5MW/5MWh energy storage system with a non-walk-in design which facilitates equipment installation and maintenance, while ensuring long-term safe and reliable operation of the entire storage system. The energy storage system supports functions such as grid peak shaving.

HJ-ESS-EPSL series, from Huijue Group, is a new generation of liquid-cooled energy storage containers with advanced 280Ah lithium iron phosphate batteries. The system consists of highly efficient, intelligent liquid cooling and reliable energy management solutions for various applications such as.
