Lithuania-specific energy storage battery

Overview

Located near Vilnius, this project will be the country's first commercial battery storage facility and is expected to increase Lithuania's total storage capacity by approximately 50%. The system is scheduled to begin operations by the end of 2025.

Located near Vilnius, this project will be the country's first commercial battery storage facility and is expected to increase Lithuania's total storage capacity by approximately 50%. The system is scheduled to begin operations by the end of 2025.

Ignitis Group, a renewables-focused integrated utility, is starting the construction of battery energy storage systems (BESS) in Lithuania. Battery energy storage parks will be installed around Kelmė, Mažeikiai and Kruonis. With a combined 291-megawatt (MW) power and 582 megawatt-hour (MWh) storage.

E-energija Group has started building Lithuania's largest battery energy storage system (BESS), known as the Vilnius BESS, with a capacity of 120MWh. Located near Vilnius, this project will be the country's first commercial battery storage facility and is expected to increase Lithuania's total.

Additional funding has been approved by the Ministry of Energy and Environment to support its ongoing energy storage procurement program, following overwhelming interest from potential beneficiaries. Meanwhile, Trina Storage has secured the first 180 MWh of battery storage projects in the country.

Utility Ignitis Group has taken a final investment decision (FID) on three large-scale battery storage projects in Lithuania. The company said yesterday (1 July) that it will begin construction on the battery energy storage system (BESS) facilities, which have a combined output of 291MW and storage.

Lithuania's Ministries of Energy and Environment have approved an additional €37 million to expand capital expenditure support for energy storage projects.

This funding supplements an existing €102 million fund managed by the Environmental Project Management Agency (EPMA) during its first call.

E-energija Group has commenced construction on Lithuania's largest battery energy storage system (BESS) project, the 120MWh Vilnius BESS. This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity by around.
