Luxembourg is making a strong push to expand its solar energy capacity with the launch of two fresh solar tenders designed to encourage investment and innovation in clean power projects. Investment Aid Tender: Supporting Solar Construction The first tender offers up to €20 million in investment aid.

An investment call offering subsidies for the construction and operation of new solar installations is open until October 17, with higher subsidies available for solar tied to battery storage. Meanwhile, a tender offering 15-year market premium contracts for solar energy produced and fed into the.

Luxembourg has launched two solar tenders with a combined capacity of 40 MW, backed by up to €20 million in investment aid. This initiative aims to further bolster the country's solar energy capacity, which is projected to reach an impressive 523 MW by the end of 2024, as highlighted in a recent.

Luxembourg set a new record in its renewable energy push in 2024, with 8,000 solar panel systems installed across the country – nearly a third of all installations – driven by government subsidies and rising interest in self-sufficient energy production. 2024 was a milestone year for Luxembourg's.

For a standard 5 kWp roof in Luxembourg, the total cost excluding grants is between €10,750 and €11,500. This price includes the supply and installation of solar panels, excluding options. It increases with the size of the installation. With natural gas prices doing the cha-cha slide since 2022.
