# Market demand for household off-grid solar systems

## Overview

---

The U.S. demand for residential off-grid solar + storage systems is rising faster than on-grid demand, albeit from a far smaller sales base, according to industry players that cater to the niche market. Rapidly rising utility costs are a major economic inspiration for the trend, they say.

The U.S. demand for residential off-grid solar + storage systems is rising faster than on-grid demand, albeit from a far smaller sales base, according to industry players that cater to the niche market. Rapidly rising utility costs are a major economic inspiration for the trend, they say.

They provide the least-cost route to reach 40% of the people who still need to be connected to electricity by 2030 — the majority of whom are living on the lowest incomes and in fragile, disaster-prone, or conflict-affected regions. Off-grid solar technologies also offer an alternative electricity.
