Mongolia BESS Energy Storage Container

Overview

The First Utility-Scale Energy Storage Project aims to install a large-scale advanced battery energy storage system (BESS) in Mongolia's Central Energy System (CES) grid. Who owns the Bess in Mongolia?

In Mongolia, where the BESS plays a crucial role in maintaining power supply reliability due to the growing number of variable renewable energy connections to the grid, a decision was made for the state-owned transmission company, the National Power Transmission Grid, to own and operate the first grid-connected BESS.

What is the Bess capacity in Mongolia?

14 N-1 standard criterion is a design philosophy to enable the stable power supply in case of loss of a single power facility, such as a transformer and a transmission line. In conclusion, the BESS capacity was 125 MW/160 MWh. Table 4 summarizes the major applications of the BESS in Mongolia.

Does Mongolia need a Bess to achieve its decarbonization target?

Mongolia's heavily coal-dependent energy sector needs a BESS to achieve its decarbonization target. Coal-dependent energy system. As of end 2021, Mongolia had 1,549 megawatts (MW) of installed power generation capacity.

Did Mongolia design the first grid-connected battery energy storage system?

A study published by the Asian Development Bank (ADB) delved into the insights gained from designing Mongolia's first grid-connected battery energy storage system (BESS), boasting an 80 megawatt (MW)/200 megawatt-hour (MWh) capacity.

What is a battery energy storage system (BESS)?

Photo credit: ADB. Size the BESS correctly, list the performance requirements in the tender document, and develop operational guidelines and pricing policy. A Battery Energy Storage System (BESS) significantly enhances power system

flexibility, especially in the context of integrating renewable energy to existing power grid.

What are Mongolia's Bess project plans?

As one of the measures to accomplish this, Mongolia's BESS project plans include the development of an ancillary-service pricing policy and guidelines. The policy and guidelines will not only help the BESS to become financially viable, but it will also remove barriers against private sector investment in future BESS projects.
