# Morocco user-side energy storage peak shaving and valley filling project

## Overview

---

Do energy storage systems achieve the expected peak-shaving and valley-filling effect?

Abstract: In order to make the energy storage system achieve the expected peak-shaving and valley-filling effect, an energy-storage peak-shaving scheduling strategy considering the improvement goal of peak-valley difference is proposed.

How can technology improve peak shaving & valley filling?

The advancement of technology plays a pivotal role in enhancing the effectiveness of peak shaving and valley filling. Innovations such as AI and IoT have led to smarter energy management systems that can predict peak times and adjust consumption automatically.

Does overloaded power grid affect peak shaving and valley filling?

The decreasing proportion of the peak-valley difference between the power grid and users' electricity purchasing costs are both lower than that in the base case when the load reduces by 20%. Thus, the dynamic price mechanism proposed in this study exhibits more obvious effects on peak shaving and valley filling when the power grid is overloaded.

Can flexible load participate in peak shaving and valley filling?

(2) A dynamic price incentive mechanism for peak shaving and valley filling is proposed in this study. The dynamic price mechanism can thoroughly explore the potential of the flexible load in participating in peak shaving and valley filling compared with the conventional fixed price mechanism.

What is peak shaving?

These techniques are crucial in balancing energy supply and demand, thereby enhancing the efficiency and reliability of power systems. Peak shaving is a technique employed to reduce the load on the electricity grid during peak

usage times.

Does constant power control improve peak shaving and valley filling?

Finally, taking the actual load data of a certain area as an example, the advantages and disadvantages of this strategy and the constant power control strategy are compared through simulation, and it is verified that this strategy has a better effect of peak shaving and valley filling. Conferences > 2021 11th International Confe.
