Myanmar Communications BESS Power Station Company

Overview

What is a Bess Solar System?

According to Solis, BESS is built to deliver efficient electricity from 8 a.m. to 7:30 p.m., even in less-than-ideal conditions. The system has a 450 kilowatt-peak solar capacity and six hybrid inverters — with a total output of 300 kilowatts — that help convert energy into usable electricity. BESS also boasts 668 kilowatt-hours of battery storage.

What is a Bess power purchase agreement?

The system is also designed to reduce grid charging to near zero. Through a Power Purchase Agreement model, BESS supports long-term affordability and sustainability. This enables users to benefit from stable and low-cost electricity over time, setting a new benchmark for green energy access in the country.

What is Bess & how does it work?

BESS is tailored for homes and businesses. It's built to drastically cut pollution by eliminating generator dependence. The system is also designed to reduce grid charging to near zero. Through a Power Purchase Agreement model, BESS supports long-term affordability and sustainability.
