# Netherlands invests in energy storage power station

## Overview

---

EP NL and Eneco are realising a large-scale battery project at Enecogen's Europoort power plant, in which both parties hold a 50% stake. The battery will have a connection capacity of 50 MW and an energy storage capacity of 200 MWh, enabling it to supply electricity for four hours.

TRICERA energy will serve as general contractor to build a 40 MWh/15 MW battery storage facility near Waardenburg for Eurus Energy Europe. Integrated with a 21 MW wind farm, it will optimize energy trading and support grid services. TRICERA energy and Eurus Energy Europe have entered into a.

The Netherlands' aim to a carbon-neutral economy by 2050 is making it a major energy storage player in Europe. Storage solutions are needed to maintain grid stability and flexibility as renewable energy penetration develops, especially offshore wind and solar. Energy storage investment is crucial.

TINC, the infrastructure investor listed on Euronext Brussels, announces a € 61 million investment in Project Mufasa, one of the largest battery energy storage systems (BESS) in the EU. The project is realised in the North Sea Port Vlissingen, a key hub for renewable energy in the Netherlands.

RWE has commissioned one of the largest Dutch battery storage systems in the Netherlands at its Eemshaven power station. With a total capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt hours (MWh), the battery will be used to balance power supply and demand in the Dutch power

grid.
