Nickel-cadmium battery cabinet

Overview

Ni-Cd batteries contain between 6% (for industrial batteries) and 18% (for commercial batteries) cadmium, which is a toxic heavy metal and therefore requires special care during battery disposal. In the United States, the expected battery recycling cost (to be used for proper disposal at the end of the service lifetime) is rolled into the battery purchase price. Under the so-called "batteries. OverviewThe nickel-cadmium battery (Ni-Cd battery or NiCad battery) is a type of using and metallic as . The abbreviation Ni-Cd is derived from the .

The first Ni-Cd battery was created by of in 1899. At that time, the only direct competitor was the , which was less physically and chemically robust. With minor impr.
