

## Kongres Container

# Panama New Energy Storage Equipment Company

**TAX FREE**

### Product Model

HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

### Dimensions

1600\*1280\*2200mm  
1600\*1200\*2000mm

### Rated Battery Capacity

215KWH/115KWH

### Battery Cooling Method

Air Cooled/Liquid Cooled

## Overview

---

On October 18, 2024, a 372kWh liquid cooling battery energy storage system (BESS) was successfully installed in Panama. GSL Energy, a China-based manufacturer specializing in energy storage solutions, purchased the system.

On October 18, 2024, a 372kWh liquid cooling battery energy storage system (BESS) was successfully installed in Panama. GSL Energy, a China-based manufacturer specializing in energy storage solutions, purchased the system.

Panama has launched a 500MW tender auction for renewables and energy storage, the first in Central America to include storage. The bidding process - held by the national secretary of energy and state-owned electricity transmission company, Empresa de Transmisión Eléctrica SA (ETESA) - is seeking.

AES is the world leader in lithium-ion-based energy storage, both through our business project and joint venture, Fluence. We pioneered the technology over one decade ago, and today almost half our new projects include a storage component. Energy storage is a “force multiplier” for carbon-free.

On December 10, 2024, GSL Energy successfully installed a 928kWh commercial and industrial energy storage system at its Panama facility. This system, designed for both grid-connected and off-grid applications, plays a crucial role in addressing local energy challenges. Its outdoor waterproof design.

Panama has initiated a groundbreaking 500 MW tender auction encompassing renewables and energy storage, marking the first such auction in Central America to include storage. The national secretary of energy and state-owned electricity transmission company, Empresa de Transmisión Eléctrica SA.

Panama has launched a 500MW tender auction for renewables and energy storage, the first in Central America to include storage. The bidding process - held by the national secretary of energy and state-owned electricity transmission company, Empresa de Transmisión Eléctrica SA (ETESA) - is.

Imagine storing electricity in giant underground balloons – that’s essentially what Panama’s groundbreaking 100MW compressed air energy storage (CAES) project is doing. As the first major CAES initiative in Central America, this \$400 million venture could solve the region’s energy storage puzzle.
