# Poland Energy Storage Power Station Planning

## Overview

---

PGE Group has laid down ambitious plans for energy storage deployment over the next ten years. In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage .

PGE Group has laid down ambitious plans for energy storage deployment over the next ten years. In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage .

Poland is accelerating its energy transition by investing not only in renewable energy sources, but also in technologies to ensure the stability of the power system. Construction of the country's largest battery-based electricity storage facility has started in Żarnowiec. Highlights: PGE has.

Polish utility PGE Group is planning to add more than 80 energy storage facilities through to 2035 to the tune of PLN 18 billion (\$4.7 billion). One of these will be the 981 MWh Żarnowiec battery energy storage project, which will be supplied with locally produced LG Energy Solution's grid-scale.

Construction of the largest energy storage facility in Poland – and one of the biggest of its kind anywhere in Europe – has begun. The site is intended to become a key part of Poland's transition towards greener forms of energy, storing surplus power produced by renewables. The facility is being.

29.10.2025 - Axpo and Energix, a leading renewable energy developer and independent power producer (IPP), have signed an agreement to optimise the largest battery energy storage system (BESS) in Poland. This is yet another such contract to be signed by Axpo in Poland this year. Under the agreement.

The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage capacity by 2028. The National Fund for Environmental Protection and Water Management (NFOŚiGW) will administer the programme. With applications now open through May 2025.

The Poland Energy Storage Integration Project is spearheaded by the National Fund for Environmental Protection and Water Management (NFOŚiGW), aiming to modernize the power grid and enhance the integration of renewable energy sources like solar and wind. The initiative includes a €1 billion subsidy.
