# Prospects of the solar inverter industry

## Overview

---

The global PV inverter market was valued at USD 34.6 billion in 2024 and is estimated to grow at a CAGR of 9.5% from 2025 to 2034. The paradigm shift toward the integration of renewable energy resources will fuel the adoption of efficient systems.

The global PV inverter market was valued at USD 34.6 billion in 2024 and is estimated to grow at a CAGR of 9.5% from 2025 to 2034. The paradigm shift toward the integration of renewable energy resources will fuel the adoption of efficient systems.

The global PV inverter market was valued at USD 34.6 billion in 2024 and is estimated to grow at a CAGR of 9.5% from 2025 to 2034. The paradigm shift toward the integration of renewable energy resources will fuel the adoption of efficient systems. Photovoltaic inverters in the last decade have.

The Solar PV Inverters Market size is estimated at USD 14.27 billion in 2025, and is expected to reach USD 19.89 billion by 2030, at a CAGR of 6.87% during the forecast period (2025-2030). The market's expansion is underpinned by a move from simple DC-to-AC conversion toward smart, grid-forming.

The PV inverter market size is valued at US\$ 15.33 billion by 2025, from US\$ 42.54 billion in 2032, at a CAGR of 15.7% during the forecast period. PV inverters are critical components in solar energy systems that convert the direct current (DC) generated by photovoltaic (PV) panels into alternating.

The global pv inverter market size was estimated at USD 13,088.5 million in 2023 and is projected to reach USD 41,869.7 million by 2030, growing at a CAGR of 18.1% from 2024 to 2030. The growing awareness regarding environmental issues and need to reduce carbon emissions is driving demand for clean.

On May 28, 2025, the performance of photovoltaic inverter companies was remarkable in 2024, with most achieving profitability. Notably, Sungrow Power Supply reported a revenue increase of 7.76% and a net profit rise of 16.92%

year-on-year. However, inverter companies now face risks related to.

The global Photovoltaic (PV) Inverters market, valued at US\$12.1 Billion in 2024, is projected to reach US\$19.8 Billion by 2030, with a CAGR of 8.4%. Key growth drivers include advances in inverter technology, residential and commercial solar adoption, and integration with smart grid and energy.
