# Saint Lucia has its own solar power generator for home use

## Overview

---

Saint Lucia has launched its first-ever solar farm, the La Tourney Solar Farm, which will provide clean energy to about 3,400 homes. Constructed on 20 acres in Vieux Fort, the facility can generate 7 megawatts of electricity, reducing Saint Lucia's reliance on imported fossil fuels.

The Caribbean region is no stranger to the benefits of solar energy. With abundant sunshine year-round, solar energy offers a viable, sustainable solution to power homes, businesses, and entire communities. In St. Lucia, solar power is quickly becoming a key player in driving economic growth and.

Electric utility company St Lucia Electricity Services is set to tender a 10 MW solar project with accompanying battery energy storage later this year. St Lucia Electricity Services (LUCELEC) is planning to tender a 10 MW solar project in Saint Lucia. According to a notice posted by the utility.

Saint Lucia is set to benefit from a multi-million dollar initiative aimed at enhancing energy efficiency and expanding the use of renewable energy. The World Bank's Board of Executive Directors has approved the Caribbean Efficient and Green Energy Buildings Project, a US\$131.87 million investment.

Francis said that St. Lucia's electricity price has almost doubled in the past 30 years, so the country has begun to build renewable energy projects such as solar energy to gradually eliminate its dependence on oil imports. In St. Lucia, the city's electricity is relatively stable, but the.

Renewable Energy is also known as "green power" or "clean energy", because it doesn't harm the environment and it is made from resources that Mother Nature will replace, these sources include Solar energy (which comes from the sun and can be turned into electricity and heat), Wind energy.
