

Kongres Container

Simplified container base station with power distribution cabinet

Overview

What is a container substation?

An intelligent solution for obtaining direct current quickly and economically is provided by container substations. By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality.

What is a modular substation?

These modular substations represent a modern and innovative approach to electrical power distribution. Their portability, rapid deployment, cost-effectiveness, and reliability make them an attractive solution for a wide range of applications, from remote industrial sites to urban power grids.

Why are container substations important?

The flexibility, cost-effectiveness, and rapid deployment capabilities of container substations make them a crucial asset in industries where power demands can change rapidly or in areas where constructing a traditional substation would be impractical.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.

What is a modular integrated transportable substation (MITS)?

Eaton's Modular integrated transportable substation (MITS) is an ultra-flexible modular substation solution designed to your specific needs. The pre fab substation is assembled on a self-supporting transformer skid or trailer,

creating an easily transportable design that can be quickly energized.

What is a pre fab power substation?

The pre fab substation is assembled on a self-supporting transformer skid or trailer, creating an easily transportable design that can be quickly energized. Factory-assembled, wired and tested, the turnkey power substation reduces costs, time, space and labor. Save time, cost and space with Eaton's MITS.
