Small-scale energy storage projects in France

Overview

Who is delivering a battery energy storage system in France?

China's Envision Energy has been selected by Kallista Energy to deliver a 120 MW/240 MWh battery energy storage system (BESS) in Saleux, northern France. The project represents Envision's first independent storage contract in the French market and signals its continued European expansion.

Does Envision Energy have a battery storage project in France?

What is the largest battery-based energy storage site in France?

Featuring 27 containers, each with a storage capacity of 2.5 MWh, it can maintain power for over 200,000 homes for one hour. With a total storage capacity of 61 MWh, this is the largest battery-based energy storage site in France. The battery-based ESS facility at the Carling platform came on stream in May 2022 and comprises 11 battery containers.

What does the Saleux battery storage project mean for Envision Energy?

The 120 MW / 240 MWh Saleux battery storage project is a landmark for both Envision Energy and France's energy infrastructure development. As France pushes toward greater renewable integration and net-zero commitments, projects like this will become increasingly essential.

What is the largest European battery-based energy storage project?

In May 2023, we launched our largest European battery-based energy storage project at the Antwerp platform in Belgium. With its 40 containers, the site will develop a capacity of 75 MWh, which is equivalent to the daily consumption of almost 10,000 homes.

What is Envision Energy's 'Saleux' project?

With this project, Envision Energy expands its footprint in Europe's fast-growing energy storage market, where demand for grid-scale solutions is surging. Envision has already executed several successful deployments across the UK, Germany, and Italy, but the Saleux contract is its first standalone BESS project in France.
