Small solar power generation system in Luxembourg

Overview

The EU-funded Innova MicroSolar project has delivered a high-performance, cost-effective concentrating solar power (CSP) system for small-scale, onsite electricity and heat generation. Photovoltaic (PV) systems use sunlight to generate electricity directly via semiconductor-based PV cells. How much energy does a solar PV system produce in Luxembourg?

Average 2.60kWh/day in Autumn. Average 1.22kWh/day in Winter. Average 4.63kWh/day in Spring. To maximize your solar PV system's energy output in Luxembourg, Luxembourg (Lat/Long 49.6113, 6.1294) throughout the year, you should tilt your panels at an angle of 42° South for fixed panel installations.

Is Luxembourg a good place to invest in solar energy?

Overall, Luxembourg actively promotes photovoltaic installations and has seen significant growth in the sector in recent years. Government support and various incentives are expected to continue to fuel the development of solar energy in the country.

Is Luxembourg a good place to install solar panels?

Luxembourg ranks 72nd in the world for cumulative solar PV capacity, with 209 total MW's of solar PV installed. Each year Luxembourg is generating 330 Watts from solar PV per capita (Luxembourg ranks 10th in the world for solar PV Watts generated per capita). [source].

How many photovoltaic installations are there in Luxembourg in 2023?

In 2023, there was a significant increase in the number of photovoltaic installations in Luxembourg – 40 MW of new photovoltaic capacity was put into operation in 2022. The total installed capacity in the country reached 317 MW.

Are there incentives to install solar energy in Luxembourg?

Yes, there are several incentives for businesses wanting to install solar energy in Luxembourg. The government offers a range of financial support measures, including grants and tax credits, as well as access to low-interest loans.

Who is solarcells?

SolarCells is the first producer of photovoltaic panels in Luxembourg, located in Hollerich. We manufacture high-quality panels using European components, certified with IEC standards, offering yields exceeding 400 Wc.
