Overview

How much does solar O&M cost?

Regulated utilities report solar O&M costs for plants that they own, representing a mix of technologies and at least one full operational year. These O&M costs are only one part of total operating expenses. Median O&M costs for the cumulative sample have declined from about \$39/kWAC-year or \$22/MWh in 2012 to about \$11/kWAC-year or \$7/MWh in 2023.

How much does a solar system cost?

She is based in Houston. Are solar panels worth it?

The average cost of installing an average-size home solar system in 2025 is \$29,360 before federal tax credits and incentives. The federal solar tax credit may reduce the net cost to \$20,552, and local incentives can further lower the cost.

How much does a solar project cost?

Cost savings seem to occur especially in projects larger than 50 MWAC at ~\$1.4/WAC vs. \$1.6/WAC for smaller projects. Regulated utilities report solar O&M costs for plants that they own, representing a mix of technologies and at least one full operational year. These O&M costs are only one part of total operating expenses.

How much does a solar module cost?

As a result, the price of solar modules has fallen to \$0.10 per watt, a considerable decline from over \$0.25 per watt two years ago. ³ While input prices remain low, the intense competition and the need to maintain high utilization rates in manufacturing facilities have led many players in the solar supply chain to operate at a loss.

How much does solar cost in 2021?

Since 2021 prices have typically ranged from \$20-45/MWh in CAISO and the non-ISO West to \$35-\$85/MWh elsewhere, with the highest prices in PJM and MISO. The market value of solar fell in 2023 to \$44/MWh on average, as energy prices returned to more normal levels.

What is NREL's solar-plus-storage cost benchmarking work?

This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up approach. First, analysts create a set of steps required for system installation.
