

Kongres Container

Solar cells for Togo communication base stations

Overview

What are containerized solar power solutions for the cellular industry?

Our Containerized Solar Power Solutions for the Cellular Industry are engineered to run 100% on solar power. They are equipped with battery storage and a AC or DC generator as an additional backup system to guarantee service continuity. All systems can be grid-tied or completely off-grid.

What is a solar cell tower micro-grid?

Sun-in-one turnkey containerized solar cell tower micro-grids provides a clean, reliable, affordable alternative to diesel generators for the telecom industry. Sun-In-One™'s telecom solar power systems are engineered with three to five days of battery storage compared to other companies that have only one day or less of battery storage.

Are solar cell towers a viable alternative to diesel generators?

The status quo solution for inconsistent and off-grid telecom infrastructure continues to be diesel generators, which come with high fuel and maintenance costs and carbon emissions. Sun-in-one turnkey containerized solar cell tower micro-grids provides a clean, reliable, affordable alternative to diesel generators for the telecom industry.
