Applications are open from Friday the 26th of February 2025 Under the 2025 schemes, you can receive up to €10,200 in grants for installing a new photovoltaic system with a hybrid inverter and battery storage.

Malta is working steadily to reduce its dependence on fossil fuels and embrace renewable energy as part of its long-term climate commitments. Backed by legally binding targets, a clear regulatory structure, and support schemes for both households and businesses, Malta's energy transition is shaped.

The government of Malta launched new grant schemes for 2025 to incentivise the use of renewable energy as part of the €10.3 million investment in renewable energy systems for households. Applications are open from Friday the 26th of February 2025 Under the 2025 schemes, you can receive up to.

Home energy storage systems offer not only reduced electricity bills, but also a more reliable power supply solar, decreased environmental impact, and long-term economic and environmental benefits. Malta is a thriving solar market with a government that has actively promoted residential solar.

The government has announced an investment of over €10 million in renewable energy grants to assist households in adopting sustainable energy solutions. Minister for Energy Miriam Dalli highlighted that this initiative underscores the government's dedication to environmental protection and.
