Solar module market sales price

Overview

This report aims to provide a comprehensive presentation of the global market for Solar Module, focusing on the total sales volume, sales revenue, price, key companies market share and ranking, together with an analysis of Solar Module by region & country, by Type, and by Application. What is solar PV module market?

Solar PV Module Market was valued at USD 280.5 billion in 2023 and is anticipated to grow at a CAGR of over 8.2% between 2024 and 2032. It is a system that converts sunlight into electricity using photovoltaic cells. These modules are composed of multiple interconnected solar cells, typically made from silicon or other semiconductor materials.

How big is the solar cells and module market?

The overall market size for the solar cells and module market was USD 191,647.5 Million in 2025. How big is the solar cells and module market expected to be in 2035?

The solar cells and module market is expected to reach USD 402,402.1 Million in 2035. What will drive the demand for the solar cells and module market during the forecast period?

.

How much does a resale solar module cost?

For example, N-Type modules by REC listed for resale in May and July pushed up weighted average prices to \$0.411 and \$0.460 respectively. P-Type modules in September increased to \$0.311 as modules by Sirius PV, Solar4America, and Panasonic were remarketed. The same price increase was present in P-Type Bifacials for the month of December.

How will the solar market grow from 2025 to 2035?

The market is set to grow a lot from 2025 to 2035. This is due to higher global

demand for green energy, lower costs for solar panels, and new tech in PV. Homes, businesses, and big power plants are using more solar cells and modules to make power from the sun.

How much does a solar panel cost?

Average EXW prices from distributors for residential solar panels are reported between €0.125/W and €0.100/W, depending on the volumes. US DDP: The spot price for TOPCon utility-scale modules DDP US rose this week from 0.71% to \$0.284/W.

How big is the Asia Pacific solar PV module market?

Asia Pacific solar PV module market is projected to surpass USD 354.6 billion by 2032. Rapid economic growth and urbanization along with increasing energy demand, particularly in countries such as China, India, and Southeast Asian nations are driving the business growth.
