Solutions for energy storage equipment installation

Overview

What is a battery energy storage system?

Battery energy storage systems (BESS) stabilize the electrical grid, ensuring a steady flow of power to homes and businesses regardless of fluctuations from varied energy sources or other disruptions. However, fires at some BESS installations have caused concern in communities considering BESS as a method to support their grids.

How can Honeywell help protect your energy storage systems?

Honeywell's advanced OT cybersecurity solutions can help protect your energy storage systems. Our comprehensive approach helps safeguard your operational technology from cyber threats, supporting the integrity, availability and confidentiality of your systems.

What are the benefits of a residential storage system?

Residential storage: Primarily used for home resiliency to deliver back-up power, these systems can also shift energy consumption to off-peak hours and integrate home solar for a low-cost clean energy supply. Residential storage systems can be eligible for Inflation Reduction Act tax credits.

Why should you invest in energy storage solutions?

Solutions that can support you improving your energy storage operations, empower your workforce with advanced tools and provide actionable insights and visualization to enhance efficiency and help you achieve your energy storage goals. Technologies to help expand the supply of sustainable aviation fuel.

Why is energy storage important?

Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.

Energy storage is essential to a resilient grid and clean energy system.

What are New York state's energy storage goals?

Learn more about installed energy storage projects and New York State's progress toward its energy storage goals. New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by 2025 and 3,000 MW by 2030.
