Spanish container energy storage station

Overview

What is Spain's biggest pumped storage facility?

Embalse de Cenza. Credit YouTube EUROPE'S biggest pumped storage facility with enough capacity to supply 10 million people with power for a day is earmarked for Spain. Spanish giant Iberdrola is set to build the €1.5bn Conso II project at Vilariño de Conso near Ourense, Galicia. Is there a dark side to Spain's green energy revolution?

.

Why should Spain invest in energy storage?

Investing in energy storage helps Spain meet its climate goals. This includes achieving carbon neutrality by 2050. Storing renewable energy instead of wasting it helps the country rely less on fossil fuels. This also cuts down greenhouse gas emissions. Pumped hydro, thermal storage, and battery systems are effective technologies.

What is containerized energy storage?

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are delivered in a single shipping container for simple installation on board any vessel. How does containerized energy storage work?

.

What is containerized ESS?

ABB has responded to rapidly rising demand for low and zero emissions from ships by developing Containerized ESS – a complete, plug-in solution to install sustainable marine energy storage at scale, housed in a 20ft high-cube ISO container.

Is Iberdrola a good energy storage company?

Iberdrola España currently leads in energy storage, with 4.5 GW of capacity installed in Spain and Portugal using pumped-storage technology, the most efficient method at present. At the end of 2022, the company reached 101.2 gigawatt hours (GWh) of storage capacity, exceeding its forecast by more than 10%.
