# Sri Lanka Northern Energy Storage Power Station

## Overview

---

This 600 MW project is designed to store surplus energy generated from solar and wind sources, enhancing grid stability and maximizing renewable energy utilization. Situated in Aranayake and Nawalapitiya, the project will consist of two reservoirs linked by a 2.5 km tunnel.

This 600 MW project is designed to store surplus energy generated from solar and wind sources, enhancing grid stability and maximizing renewable energy utilization. Situated in Aranayake and Nawalapitiya, the project will consist of two reservoirs linked by a 2.5 km tunnel.

Sri Lanka 's electricity demand is currently met by nine thermal power stations, fifteen large hydroelectric power stations, and fifteen wind farms, with a smaller share from small hydro facilities and other renewables such as solar. Most hydroelectric and thermal/ fossil fuel -based power stations.

Abstract: Pumped hydro storage (PHS) is a well-established technology for storing energy in large quantities and over long periods. Sri Lanka, a country rich in hydropower resources, has significant potential for PHS development. The central highlands, where the country's major hydropower plants.

The Ceylon Electricity Board (CEB) is preparing to launch the Maha Oya Pumped Storage Hydropower Project, known as Pumped Storage Power Plants (PSPP), its first-ever 'Water Battery', located in Aranayake and Nawalapitiya. This groundbreaking 600 MW project will store surplus renewable energy from.

The Ceylon Electricity Board (CEB) has announced that it is making substantial progress in launching the Maha Oya Pumped Storage Hydropower Project, marking Sri Lanka's first-ever large-scale energy storage system, often referred to as a "Water Battery." This 600 MW project is designed to store.

ECONOMYNEXT - Sri Lanka's state-run Ceylon Electricity Board said it has begun seeking funds to build a 600 MegaWatt pumped storage plant to integrate solar and wind energy and maintain grid stability. The CEB wanted to tap multilateral lenders to reduce electricity sales prices. "At a recent.

The Maha Oya Pumped Storage Hydropower Project, Sri Lanka's first-ever 'water battery,' announced by the Ceylon Electricity Board (CEB) last week, is estimated to cost around \$ 1 billion, with construction set to be completed by 2031 provided the CEB successfully completes the detailed design of.
