# Sudan Distributed Energy Storage Quote

## Overview

---

Does Sudan have wind and solar power?

Sudan has significant wind and solar energy resources that are largely untapped. According to a World Bank study, Sudan has significant wind power potential along its coast on the Red Sea and in the Northern State. Sudan also has solar power potential, but renewable power tends to be small in scale and used for off-grid solutions.<sup>16</sup>

How much liquid fuel does Sudan produce a day?

Sudan produced an average of about 70,000 barrels per day (b/d) of total liquid fuels in 2023, and South Sudan produced an average of about 149,000 b/d. Sudan's total liquid fuels production has steadily and significantly declined over the past decade because upstream exploration and development has been lacking in the country.

Why is liquid fuel production declining in South Sudan?

Sudan's total liquid fuels production has steadily and significantly declined over the past decade because upstream exploration and development has been lacking in the country. Growth in South Sudan's total liquid fuels production has been relatively flat, averaging about 153,000 b/d over the past decade.

How many oil refineries are in Sudan?

Sudan has three oil refineries and three topping plants (smaller, less complex refineries). However, most of these facilities have either been shut in or decommissioned; only the al-Jaili refinery, which is the country's largest refinery and is approximately 45 miles north of Khartoum, and the El-Obeid topping plant are currently operating.

How did the secession of South Sudan affect the economy?

The secession of South Sudan significantly affected Sudan's economy because

Sudan lost 75% of its oil reserves to South Sudan. Sudan and South Sudan's oil sectors play a vital role in both economies and are closely linked to each other; most of the oil-producing assets are near or extend across their shared border.
