The redox flow project has enormous storage capacity, expected to be finished in mid-2028. This is what the Laufenburg Technology Center is supposed to look like. Completion is scheduled for 2028 Image: Flexbase From ESS News Flexbase Group has begun construction on what could become one of.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's largest. The companies inaugurated the newly expanded project last week in a ceremony last week (24 May), which adds 8MW.

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and the increase in electric cars. This website aims to give an overview of the energy storage situation in Switzerland. It was created as part of an BFE.

The energy storage provider INTILION and Axpo, one of the largest producer of renewable energy in Switzerland, have successfully completed the first joint project. In Frauenfeld in the canton of Thurgau, the INTILION | scalecube large-scale storage unit with a total capacity of around 3.0 MWh was.
