The largest energy storage project to be developed

Overview

The Darden Battery Energy Storage System (BESS) is set to become the largest battery storage project in the US once completed. Developed by IP Darden I, LLC, a subsidiary of Intersect Power, the project integrates a 1,150 MW solar photovoltaic facility with 1,150 MW / 4,600 MWh of.

The Darden Battery Energy Storage System (BESS) is set to become the largest battery storage project in the US once completed. Developed by IP Darden I, LLC, a subsidiary of Intersect Power, the project integrates a 1,150 MW solar photovoltaic facility with 1,150 MW / 4,600 MWh of.

In 2025, utility-scale battery storage is projected to expand by a record 18.2 GW, following a historic 10.3 GW added in 2024. These systems play a crucial role in balancing supply and demand, enhancing grid stability, and supporting the integration of renewable energy. The largest upcoming BESS.

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, California, includes 500 MW of solar and 500 MW of four-hour battery storage, all under a 15-year contract with Amazon.

Governor Janet Mills and Maine's congressional delegation announced today that the U.S. Department of Energy has awarded a \$147 million grant to develop the largest long-duration energy storage project in the world to date. The project will enhance grid resiliency, allow for the transmission of.

BECKER, Minn. (KVRR) — Xcel Energy has announced plans to build the Midwest's largest battery energy storage site. It'll be at the Sherco Energy Hub in Becker in central Minnesota. The proposal, filed with Minnesota Public Utilities Commission last Friday, would double the amount of battery storage.

MINNEAPOLIS (Nov. 3, 2025) — Xcel Energy plans to build the Midwest's largest battery energy storage site at the Sherco Energy Hub in central Minnesota. The project is among a series of investments that will strengthen the region's energy security and expand the company's investment at Sherco and.

The California Energy Commission has approved the Darden Clean Energy Project, setting a new benchmark as the largest battery energy storage system (BESS) in the world. This project is the first to benefit from the state's Opt-In Certification Program, designed to accelerate the transition to clean.
