Overview

Located less than an hour from Lake Tahoe, Gigafactory Nevada is one of the world's highest volume plants for electric motors, energy storage products, vehicle powertrains and batteries—producing billions of cells per year.

Located less than an hour from Lake Tahoe, Gigafactory Nevada is one of the world's highest volume plants for electric motors, energy storage products, vehicle powertrains and batteries—producing billions of cells per year.

According to a report by Fortune Business Insights™, the market size for battery energy storage is valued at USD 25.02 billion in 2024 and is expected to reach 114.05 billion by 2032 with a CAGR of 19.58% from 2025 to 2032. The market is set to reach a valuation of USD 32.63 billion in 2025. 1. GE.

Fullmark Energy quietly shuttered Swiftsure, a planned 650-megawatt energy storage system on Staten Island. The biggest battery project in New York has been canceled in a major victory for the nascent nationwide grassroots movement against energy storage development. It's still a mystery why.

Located less than an hour from Lake Tahoe, Gigafactory Nevada is one of the world's highest volume plants for electric motors, energy storage products, vehicle powertrains and batteries—producing billions of cells per year. Now we're continuing to grow Gigafactory Nevada with a lithium iron.
