Togo New Energy solar Site

Overview

Togo, a small West African nation, is poised for a significant boost in its renewable energy capacity. In May 2025, the African Development Bank (AfDB) approved a financing package of €26.5 million to support the construction of a new solar power plant in central.

Togo, a small West African nation, is poised for a significant boost in its renewable energy capacity. In May 2025, the African Development Bank (AfDB) approved a financing package of €26.5 million to support the construction of a new solar power plant in central.

Togo is advancing its clean energy goals with the construction of a 42MW solar PV plant in Sokodé, set to become the country's largest solar facility. This project is a key part of Togo's strategy to transition to renewable energy and achieve its ambitious goal of 50% renewable energy in its power.

Togo, a small West African nation, is poised for a significant boost in its renewable energy capacity. In May 2025, the African Development Bank (AfDB) approved a financing package of €26.5 million to support the construction of a new solar power plant in central Togo. This investment will finance.

Togo has taken a major step forward in its renewable energy push with plans to build a 62 MWp solar power plant in Sokodé. The project, backed by a €26.5 million (17.4 billion CFA francs) investment from the African Development Bank (AfDB), is part of the country's strategy to reach 200 MWp of.

(Togo First) - Togo is preparing to launch an ambitious 400-megawatt (MW) solar energy development project as part of its strategy to achieve universal access to electricity by 2030. Last week, a technical workshop was held in Lomé to design the competitive process for the project's implementation.

Key Figures & Findings: The African Development Bank Group has approved a \$28.9 million (€26.5 million) financing package to support the development of a 62 MWp greenfield solar photovoltaic plant in Sokodé, Togo. The financing structure includes a loan of up to \$20.1 million (€18.5 million) from.

Togo has begun construction on a 25 MW solar plant with 36 MWh of battery storage in the country's north. China's TBEA International Engineering is leading the project, which is scheduled for completion within 13 months. An installation ceremony for the project took place last week Image: Togo's.
