Trinidad and Tobago Mobile Base Station solar Energy Storage Project Bidding

Overview

What is the solar Castle project in Trinidad & Tobago?

The solar castle project in Trinidad and Tobago is the prime step to securing energy security. It is the catalyst for Trinidad and Tobago's clean energy transition, a phenomenon to which many international investors have developed an increasing appetite.

Why should Trinidad and Tobago invest in a solar park?

The solar park will help Trinidad and Tobago achieve its Paris Accord commitment to reduce greenhouse gas emissions in the power generation section by 30% by 20230. The project is expected to generate 225,303 MWh electricity and supply enough clean energy to power 31,500 households. Value of the project to Trinidad and Tobago.

What is Lightsource BP & Shell doing in Trinidad & Tobago?

The proposal involves a consortium of Lightsource bp, bp and Shell working together to develop a solar installation that will have an output power capacity of 92MW (Megawatts) in Trinidad and Tobago. Watch a summary of activity from our worldwide solar development projects in 2024.

How many MW of renewable power will Trinidad & Tobago have?

In July 2019, bp, Shell and Lightsource bp formed a consortium and submitted a proposal in response to the Government's Request for Proposals to build, own, operate, and supply up to 130 MW of renewable power to Trinidad and Tobago's national grid.
