

Kongres Container

UAE Industrial Energy Storage Cabinet Combination Solution

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Overview

Is MKC implementing a joint production & service agreement in the UAE?

Currently, MKC Group of Companies has concluded a list of agreements and is implementing them within the framework of a joint production and service enterprise in the UAE, an exclusive distribution agreement for the design, trade and post-service maintenance of energy storage devices based on CATL battery solutions.

What are CATL battery-powered energy storage systems?

CATL battery-powered energy storage systems provide energy storage and flexibility in power generation. Instant utilization and energy output due to battery electrochemical technology and the technology of electricity production using gas-piston units can be combined into a single most efficient system.

What are the advantages of a multi-cabinet system?

Multi-dimensional use, stronger compatibility, meeting multi-dimensional production and life applications High integration, modular design, and single/multi-cabinet expansion Zero capacity loss, 10 times faster multi-cabinet response, and innovative group control technology.

What are the benefits of a low-voltage AC-side cabinet integration?

Low-voltage connection for AC-side cabinet integration, ensuring zero energy loss Four-in-one Safety Design: "Predict, Prevent, Resist and Improve" Predict: AI-powered big data analytics for 8-hour advance fault prediction Prevent: High-precision detection provides 30-minute early warnings.

How does a CATL energy storage system work?

CATL energy storage systems provide smart load management when working in parallel with the network, instantly modulate the frequency and peaks depending on the load on the external network. In this case, the ESS performs

the functions of increasing and expanding peak power, backup power functions and smoothing consumption peaks.
