Ukraine s energy storage exceeds 20 billion yuan in new energy

Overview

Against the backdrop of energy transition and geopolitical challenges, Ukraine has reached a new energy milestone. DTEK, Ukraine's largest private energy company, in collaboration with U.S.-based Fluence, will deploy energy storage systems across the country with a total capacity of .

Against the backdrop of energy transition and geopolitical challenges, Ukraine has reached a new energy milestone. DTEK, Ukraine's largest private energy company, in collaboration with U.S.-based Fluence, will deploy energy storage systems across the country with a total capacity of .

DTEK's Fluence Gridstack battery units at one of six energy storage sites across Ukraine, part of the country's largest battery energy storage project announced on July 10, 2025. (DTEK press service) DTEK, Ukraine's biggest private energy company, has begun final commissioning of the country's.

In July 2024, the National Energy and Utilities Regulatory Commission (HKPEKП) broke new ground with Resolution № 2133, introducing Ukraine's first five-year capacity-remuneration mechanism tailored for storage. Launched on 7 August 2024 as pilot tender UA-2024-08-07-001, this scheme guarantees.

DTEK is to build a series of energy storage systems in Ukraine with a capacity of 200 MW to help build a secure and green energy system. €140 million will be invested in the project, making the company the largest investor in energy storage in Ukraine. The systems will be commissioned no later than.

DTEK and Fluence, a global leader in energy storage, have announced the early deployment of this project. The 200 MW system, spanning six locations, is in its final phase, including commissioning, testing, and initial battery discharge. A total of 698 Fluence Gridstack modules have been installed.

Since 2022, the country's energy infrastructure has absorbed over \$10 billion in war-related damages according to World Bank estimates. Rolling blackouts during peak winter months have become sort of a grim routine for millions. Here's the kicker: Ukraine's grid was already operating at 85%.

Ukraine's largest private energy company, DTEK, has inaugurated a major battery storage facility designed to bolster the country's electricity grid ahead of anticipated Russian attacks this winter. Developed in partnership with American firm Fluence Energy Inc., the system comprises 698 Gridstack.
