Vietnam Solar System Project

Overview

The announcement was released on November 3, confirming that SolarBK, a pioneer in Vietnam's renewable energy sector for nearly two decades, has joined forces with Banpu NEXT, a leading ASEAN provider of clean and net-zero energy solutions, and Amata VN, one of Vietnam's foremost.

The announcement was released on November 3, confirming that SolarBK, a pioneer in Vietnam's renewable energy sector for nearly two decades, has joined forces with Banpu NEXT, a leading ASEAN provider of clean and net-zero energy solutions, and Amata VN, one of Vietnam's foremost.

SolarBK, Banpu NEXT, and Amata VN have formed a strategic alliance to develop rooftop solar systems with a total capacity of 227MW across Amata industrial parks in Halong and Long Thanh. The announcement was released on November 3, confirming that SolarBK, a pioneer in Vietnam's renewable energy.

The country's updated Power Development Plan 8 will continue this trajectory, with solar making up most of the country's energy supply by 2050. Solar energy in Vietnam has rapidly transformed the country's renewable energy landscape, positioning it as a regional leader. Driven by surging energy.

Ho Chi Minh City, 19 June 2025—Vietnam took a major step toward deploying solar energy with the official launch of the Balcony Solar Systems for Vietnam (BSS4VN) project. The kick-off ceremony marked the start of an innovative pilot that seeks to replicate Germany's success with plug-and-play solar.

According to World Wildlife Fund Vietnam (WWF-Vietnam), Vietnam's solar energy is evaluated as having high development potential renewable energy (RE) sources. [2] On average, the solar radiation ranges from 1,300 to 2,900 kWh per year, increasing towards the southern regions. [3] This article.

One of the most notable projects is the 450 MW Trung Nam solar farm in Ninh Thuan, developed by Trung Nam Group. This solar farm, operational since 2020, is among the world's largest and is a testament to Vietnam's commitment to expanding its solar energy capacity. Other significant projects.

Vietnam's Ministry of Industry and Trade has approved the inclusion of 142 solar power projects, which were previously inspected, into the implementation scheme of the Power Development Plan for the period 2021-2030, with a vision until 2050 (PDP VIII). The 100 MW Ea Sup 3 solar power complex.
