

Overview

Where are PV inverters made?

The plant specializes in grid-tied and hybrid inverters. GoodWe, a China-based PV inverter manufacturer, has started operations at its first overseas manufacturing plant in Haiphong, Vietnam. The facility covers approximately 14,800 square meters and will initially specialize in the production of grid-tied and hybrid inverters.

What is the voltage range of INVT inverters?

INVT's series of universal and medium voltage inverters have a voltage range from 220 V to 10 kV. They control synchronous and asynchronous motors and have built-in servos, with capacities ranging from 0.4 kW to 10000 kW.

Who manufactures inTV products?

INVT's products are manufactured on CE standard for the European market and UL standard for the North American market. All processes from design to production, release of INVT products are strictly 100% inspected and certified by TÜV SÜD system. INVT uses components and technology of Germany.
