# What is the size of an outdoor power supply in Portugal

## Overview

---

Just like the rest of Europe, the voltage in Portugal is 230 volts and the frequency is 50 Hz. Portugal has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.

Just like the rest of Europe, the voltage in Portugal is 230 volts and the frequency is 50 Hz. Portugal has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.

In Portugal, types C and F are the official standards. Like almost all Continental European countries, Portugal has standardized on the German plug and socket system. What is the mains voltage in Portugal?

Just like the rest of Europe, the voltage in Portugal is 230 volts and the frequency is 50.

Which power outlets do they use in Portugal?

The electrical outlets in Portugal are the same as those in neighboring Spain: Type C and Type F. They both have two round holes, but Type F also has two grounding clips, while Type C is ungrounded. In Lisbon and throughout Portugal, Type F tends to be.

What is the plug for Portugal?

Before you travel, check the information below to make sure your electronic devices are compatible with the outlet type and voltage. Portugal uses outlet types C, F at a voltage of 230V and a frequency of 50 Hz. Plug Compatibility: Type C, Type F Voltage: 230V (NP).

In Portugal, there are two main types of power plugs and outlets: Type C and Type F. Type C: Type C plugs have two round prongs on either side of the plug, commonly known as Euro plugs. Mostly used in Europe, South America, and Africa. Type C outlets can be fit with either Type E or Type F plugs.

The standard voltage in Portugal is 230 V. The standard frequency is 50 Hz. This is similar to the electricity standard in other European countries including the UK, but different to the USA and Japan, for example, that use 120 V and 100 V respectively. So electrical appliances from the UK will.

Type C: also known as the Europlug, is a two-pin plug commonly used in most European countries, as well as in parts of Asia and Africa. It features two round pins measuring 4mm in diameter, with a distance of 19mm between them. This compact and lightweight design makes it easy to use and travel.
