Where is the battery cabinet installed

Overview

The cabinet should be installed in a place where walls and/or ceilings do not block ventilation. How do I connect a battery cabinet to a power system?

Procedure 1. Furnished with the battery cabinet are battery disconnect circuit breaker alarm lead assemblies. Refer to the power system installation manual to use these alarm leads to connect the battery cabinet battery disconnect circuit breaker alarm into the power system alarm circuits.

How do you reinstall a battery cabinet?

Reinstall the left side panel on the left-most battery cabinet after interconnection. Push the third battery cabinet into position, align with the seismic anchoring (if any), level the battery cabinet, and interconnect with the other battery cabinets as described in step 2, step 3, and step 5.

How do you level a battery cabinet?

Remove the side panels that are adjacent to the other battery cabinets. Push the right-most battery cabinet into position. For seismic anchoring, ensure that the rear seismic bracket connects to the rear anchors. Lower the levelling feet until they connect with the floor - use a bubble-leveler to ensure that the cabinet is level.

How do I install a VDC battery cabinet?

Set first battery in cabinet and attach the long lead (fast-on connector side marked positive) from the cabinet to the fast-on terminal on the positive terminal of the battery. See Figure 24. Facing left Facing right Facing left
Vertiv™ NetSure™ 211 SERIES -48 VDC Battery Cabinet Installation & User Manual (Section 6023) Rev. L 23 Figure 24:.

How do I connect a battery cabinet to an ups?

In systems with more battery cabinets, only the system BMS of battery cabinet 1 (the battery cabinet closest to the UPS) is connected to the UPS.

Remove signal cable 0W13441 between the SMPS I/O port and the DRY CONTACT ports on battery cabinet 2 and battery cabinet 3. • SG IO 1: Used for sending signals for minor and major alarms to the UPS.

Why is a battery cabinet dangerous?

- The battery cabinet contains an internal energy source. Hazardous voltage can be present even when the UPS system is disconnected from the utility/mains supply. Before installing or servicing the UPS system, ensure that the units are OFF and that utility/mains and batteries are disconnected.
