Where to get solar energy on site

Overview

Where can I find out more about solar energy?

For more information on solar energy in the 13-county area, visit the Omaha Public Power District's "customer-owned generation" website. It offers a solar calculator for estimated costs and builds. Estee also recommends seeking several bids on any potential solar project.

Which sites are being developed for solar power?

Two sites are being developed for solar power: the Groveland Mine in Dickinson County, a 347-acre former iron mine tailings site gifted to the state, and 7 Mile Pit in Crawford County, a 169-acre property previously used for sand and gravel mining that the state acquired through tax reversion.

What are the top energy technologies for on-site generation?

The top energy technologies leading the way when it comes to on-site generation include: Rooftop solar remains one of the most accessible and cost-effective ways to generate on-site power, particularly for facilities with high daytime energy usage.

Is rooftop solar a good option for a building?

Rooftop solar remains one of the most accessible and cost-effective ways to generate on-site power, particularly for facilities with high daytime energy usage. These systems can typically offset a large portion of energy consumption in a building and are relatively simple to install.

What is on-site energy & how does it work?

On-site generation reduces these risks by producing energy directly at the facility, lowering transmission losses and offering the flexibility to operate in tandem with or independently from the grid. What's Driving The Shift To On-Site Energy?

There are several factors contributing to the widespread adoption of distributed generation, including:.

Why should businesses generate their own electricity on-site?

Rising capacity charges, unpredictable market prices, and mounting sustainability targets are prompting a growing number of businesses to generate their own electricity on-site.
