The Jackery 2000 v2 is the best power station for most people who need ample power when off-grid camping, at home, or for an extended blackout. Recently price-reduced, it can now be found for under \$800 on Amazon. At 39 lbs, it is light enough that most people will find it easy to pack and move.

The OUPES Mega 1 stands out with its expandable 1024Wh LiFePO4 battery, which can be doubled or more by adding the B2 extra battery, reaching an impressive 5120Wh capacity. It delivers a powerful 2000W continuous AC output (4500W peak), making it suitable for running heavy appliances like.

What is the largest portable power station?

The current titleholder is the EcoFlow Delta Pro Ultra, boasting a staggering 21.6 kWh expandable capacity—enough to power an entire home for days. But why does size matter, and how do you choose the right one for your needs?

Portable power stations have.

It's a great all-rounder with a decent 1024Wh battery capacity suitable for

general use at home, in the car, and on job sites. In our review, we liked the fast charging, port selection, and the UPS with a 10ms switchover for continuous power. Alternatives include the ultra-powerful Anker Solix.

With its 2,042.8Wh capacity (expandable to 5kWh with extra batteries), it can keep essential appliances running during outages or power a weekend camping trip with ease. The balance of capacity, charging speed and portability makes it the most versatile option for people who want one power station. What is the best portable power station?

If power and battery capacity are what you are after, the Delta Pro is the ultimate large-form power station. If you are searching for a compact portable power station for on-the-go activities, the Jackery Explorer 300 is our recommendation. This unit is ideal for charging phones and laptops or running small appliances like lights and fans.

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

How many devices can a portable power station run?

So long as your portable power station has the right ports and enough capacity, it can run a massive range of devices, including phones, laptops, and desktops. Higher capacity units will also let you power large home appliances and charge electric vehicles.

What are the performance metrics for portable power stations?

Currently, we look at two main performance metrics for portable power stations: charge time and discharge capacity. Every company that sells portable power stations provides the expected number of watt-hours its products are supposed to last. That can vary from as low as 240 watt hours to as many as 2,000 watt hours for a larger power station.

What is the best portable power station for camping?

EcoFlow Delta Mini (882Wh) (Update: Out of stock): When we tested it, this model hit a sweet spot of basic functionality, capacity and price, earning it a spot on our list as the best portable power station for camping. It also supported charging with solar panels. Unfortunately, it's no longer available

for sale.

Are portable power stations expensive?

Updated June 2025: We've added a Bluetti model, honorable mentions from EcoFlow and Acer, and a testing and FAQ section. Portable power stations can be very expensive, but discounts, sales, and deals are common. If you can afford to wait, you can likely get your chosen power station for less than the listed MSRP. Figure out how much power you need.
