Zambia solar energy storage solution design

Overview

Can battery storage be used with solar photovoltaics in Zambia?

The Zambian regulation foresees customs duty and VAT exemptions for most equipment used in renewable energy or battery storage projects. Detailed information is provided in In this section, we discuss the opportunity of battery storage in combination with solar photovoltaics from a financial point of view.

How much does a solar battery cost in Zambia?

Africa Clean Energy Technical Assistance Facility. (2022). Customs Handbook for Solar PV Products in Zambia. Bloomberg New Energy Finance. (2022, December 6). Lithium-ion Battery Pack Prices Rise for First Time to an Average of \$151/kWh.

Will Zambia increase its solar power capacity by 2030?

The Zambian government has set a target to increase its installed solar and wind capacity to 600 MW by 2030. However, the current installed capacity for solar photovoltaics is only 90 MWp, indicating significant underutilisation of Zambia's potential in the renewable energy sector.

Why should German and European service providers invest in Zambia?

For German and European service providers active in the energy sector, Zambia presents significant potential for business development. There are clear needs across the solar energy and storage value chain, including project development and financing, equipment manufacturing, system integration and contracting.

Does Zambia have a good solar system?

Zambia benefits from excellent solar resources, with a specific production output between 1,600 and 1,800 kWh/kWp per year. The regions with the best re-sources are the south-west part of the country as well as the region around Lake Bangweulu, east of Mansa.

Is concentrated solar power relevant to a C&I company?

Concentrated solar power (CSP) involves large projects that are more relevant in the context of a utility than in the context of a C&I company. It is relevant in combination with thermal storage, which is out of the scope of this sector analysis. Geothermal energy is being explored in Zambia, which has initial promising results (REPP, sd).
